

TECHNICAL ASSISTANCE WE PROVIDE

Services that do not require an engineer are at a rate of \$45/hour plus one-way travel to the site.

- Erosion and sediment control recommendations and information
- Shoreline stabilization guidelines
- Revegetation plans
- Gravel road maintenance guidance
- Planting recommendations and buffer designs
- Event/workshop planning assistance (for adults and/or children)
- Outreach/education plans
- School/business/training presentations surrounding natural resource topics

CONTACT US

Mackenzie grew up in Baltimore, Maryland and moved to Concord, New Hampshire in 2008. After working on more vegetable, fruit and dairy farms, she attended the University of New Hampshire and earned an associate's degree in Integrated Agricultural Management.

Matt grew up in Bangor, ME before moving to Westbrook in 2016 to study Environmental Science at the University of Southern Maine. He graduated in May of 2019 with a Bachelor's of Science degree, and is thrilled to be able to work in an environment that share's his passion for nature and conservation. He enjoys reading, hiking, traveling and his cat Rosie.

ANDROSCOGGIN VALLEY SOIL AND WATER CONSERVATION DISTRICT

MAKING CONSERVATION WORK
FOR YOU!

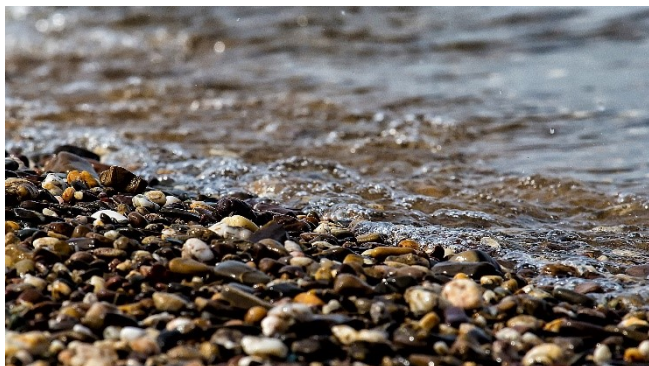

WWW.ANDROSCOGGINSWCD.ORG

WELCOME TO OUR DISTRICT

Androscoggin Valley Soil and Water Conservation District is an organization cooperating with individuals, property owners, federal and state government agencies, municipal and county government, business and industry sector leaders, non-profit organizations, and many more, to help manage and protect natural resources on private and public lands.

We value the results of our efforts; soil and water quality improvement, contributions to our local agricultural community, viable natural resource-based businesses, quality of life in our environment, enhanced natural environments, and an informed public.

ABOUT THE DISTRICT

OUR MISSION

To protect and conserve our natural resources by promoting stewardship in Androscoggin and Sagadahoc Counties.

OUR GOALS

The Conservation District's main goal is to teach proper land use to maintain fertility, prevent flooding and erosion, maintain and restore wildlife habitats, and protect our water supply.

We have a productive partnership with USDA Natural Resources Conservation Service (NRCS) that aims to protect the natural resources of Androscoggin and Sagadahoc Counties through voluntary programs.

RECENT EVENTS

- Invasive Forest Pest Workshops
- Pond Design and Biology Workshop
- Septic System Installers Training
- Places for Pollinators Workshop
